Incidence of Violence: Report of Findings
September 2006

Measuring DJJ Incidence of Violence: Report of Findings
Monitor Cathleen Beltz
September 2006

INTRODUCTION

The purpose of the analysis is to establish a baseline count of incidents of violence across the eight operating DJJ facilities, excluding camps, for two six month periods from January through June 2005 and January through June 2006. DJJ compiles summary data for uses of force and serious incidents as they are reported by facilities. However, these reports do not purport to reflect all incidents of violence. Currently, there is no consistent tracking and summarizing system in place for incidents of violence not recorded in serious incident or use of force reports. Documentation of youth disciplinary actions (DDMS) related to violence in DJJ facilities is tracked and summarized regularly. However, DDMS summaries count individuals involved rather than number of actual incidents. For example, three youth engaged in a mutual fight is summarized as *three* separate incidents (one disciplinary action for each youth involved) rather than *one* fight involving three youth. Relying solely on DDMS summary data for incidents of institutional violence would result in inflated counts.

Every DJJ facility maintains daily records of incidents of violence and other noteworthy events in supervisor log books and/or Daily Operational Security Reports (“daily operational reports”). Generally, facility staff record incidents as they occur on units and facility grounds. These incidents are summarized on site in the form of daily operational reports and/or kept in log books that facilities archive. Log books and daily operational reports also contain information about uses of force (including secure area extractions), injuries to staff and youth, suicidal or disruptive behavior as well as daily facility population and movement. Current DJJ policy does not require specific daily operational or log book reporting and, as a result, there is variation in reporting practices between facilities.

Headquarters indicates that facility staff attempt to record all incidents of institutional violence in daily operational reports or log books, which makes them the most comprehensive source for these data currently available. For this analysis, data collection was limited to information that is reported consistently across facilities. However, variation in reporting practices necessarily affects the accuracy of this count and should be considered in drawing conclusions.

The monitor received copies of typewritten daily operational reports for eight DJJ facilities for the first six months of 2005 and 2006. Because Stark does not input daily operational information to a computer, institutional violence data for 2005 was coded and input from supervisor log books at the facility in Chino. For the 2006 data, DJJ provided copies of relevant pages from the supervisor log book. O.H. Close provided a complete set of daily operational reports for the periods requested. For the remaining facilities, there were some missing days and/or shifts as noted in Attachment A.

To examine the frequency of serious incident reporting for various types of incidents of violence occurring in DJJ facilities for the two time periods analyzed, the monitor reviewed copies of all serious incident reports as well as DJJ serious incident report summaries for the two periods. DJJ provided a total of 527 reports. However, DJJ serious incident report summaries for the same period show a total of 573 serious incidents, a difference of 46 reports. For the 2005 period, DJJ provided 51 fewer serious incident reports than summaries reflect. However, for the 2006 period, DJJ provided 5 more serious incidents reports than summaries indicate.¹ The initial objective of identifying *all* serious incidents reported could not be accomplished for this report given the discrepancies described. However, trends in

¹ See Attachment B for serious incident reports provided and DJJ Serious Incident Report Summaries.

serious incident reporting at each facility may be gleaned from serious incident reports provided.

METHODS

The data source for the analysis includes: (1) daily operational reports for seven DJJ facilities including, N.A. Chaderjian Youth Correctional Facility (“Chaderjian”), Dewitt Nelson Youth Correctional Facility (“Dewitt”), El Paso De Robles Youth Correctional Facility (“Paso Robles”), O.H. Close Youth Correctional Facility (“O.H. Close”), Preston Youth Correctional Facility (“Preston”), Southern Youth Correctional Reception Center and Clinic (“Southern Clinic”) and Ventura Youth Correctional Facility (“Ventura”) for two six month periods from January through June 2005 and January through June 2006; (2) Stark facility supervisor’s log book for January through June 2005 and 2006; (3) serious incident reports provided for the same facilities and time periods; and (4) monthly population data for January through June 2005 and January through June 2006. Incidents were recorded using SPSS data analysis software. A total of nine (9) items were recorded including, “facility,” “year,” “month,” “date,” “time of incident,” “type of incident,” “use of force,” “serious incident report” and “gang related.”

The “facility” item indicates at which facility incidents occur.

The “year,” “month,” “date” and “time of incident” items are recorded for purposes of identifying incidents for specific periods.

The “time of incident” item is recorded as it appears in copies of daily operational reports provided. Where daily operational reports provided do not indicate times of incidents, no time is recorded.

The “gang related” item includes incidents identified as gang related in serious incident reports. Daily operational report entries for most facilities often indicate that gang

activity is a likely cause of many incidents of violence. However, because reporting practices vary and not all gang involvement is noted, serious incident reports are the only identifier of gang related activity recorded for this analysis.

The “type of incident” item includes the following categories:

- *NFI* [“not following instructions”] *or other disruptive behavior* --includes incidents *not* involving contact between youth and staff that result in staff use of force. Among items included in this category are incidents of not following instructions, damaging or attempting to damage state property, rough playful behavior, attempted batteries and gassings, self-injurious behavior *not* identified as attempted suicides in daily operational reports or serious incident reports, and defiant or otherwise disruptive behavior. Incidents of “NFI or other disruptive behavior” are only significant in relation to use of force data recorded in daily operational reports (see discussion below).
- *one-on-one* --includes all fights between two youth without regard to whether use of force was indicated. This item only includes incidents where physical contact was made and excludes rough playful behavior.
- *2 or more-on-one*-- includes reported attacks of two or more youth on one youth victim without regard to whether use of force was indicated. This item only includes incidents where physical contact was made and excludes rough playful behavior.
- *3-or-more* --includes reported mutual fights between three or more youth, where contact was made, without regard to whether use of force was indicated. This item excludes rough playful behavior.
- *Group Disturbance* --includes reported mutual fights, where contact was made, without regard to whether use of force was indicated. This item includes all incidents

identified as “multiples” or “group disturbances” in daily operational reports or corresponding serious incident reports and excludes rough playful behavior.

- *Staff Battery*-- includes all reported batteries on staff where contact was made, without regard to whether use of force was indicated, that are recorded in daily operational reports or corresponding serious incident reports. This item includes incidents where youth, in resisting restraint, injured staff through direct physical contact. This item also includes the few cases involving spraying of liquids *other* than bodily fluids that made contact with staff clothing or skin. Where corresponding serious incident reports were provided, daily operational reports entries were supplemented and data was coded accordingly.
- *Staff Gassing*-- includes all batteries on staff with bodily fluids or suspected bodily fluids without regard to whether use of force was indicated. Where corresponding serious incident reports were provided, daily operational report entries were supplemented and staff assaults were coded accordingly.
- *Sexual Assault* --includes incidents reported as “sexual assaults” in daily operational reports or corresponding serious incident reports. This category does not include gestures or comments of a sexual nature or consensual sexual conduct.
- *Suicide Attempt*-- includes all incidents reported as “attempts” in daily operational reports or corresponding serious incident reports, without regard to whether use of force was indicated. This item excludes incidents reported as suicidal “gestures” and “threats.”
- *Secure Area Extraction*--includes all extractions from unit “rooms,” outdoor “SPAs” or other secure areas. There were several incidents in which force was used on youth in their rooms when youth held their tray slots open or “damaged state property” in

their rooms. These uses of force were followed by the removal of youth from their rooms for decontamination showers. However, unless “extraction” or extraction procedures were noted, these incidents were coded as “NFI or other disruptive behavior.” Secure area extractions are more appropriately categorized as uses of force rather than types of incidents. However, in order to identify and display which types of extractions were used (chemical and/or physical), extractions are coded under the “type of incident” item.

The “Use of Force” item includes the following categories:

- *Chemical*--includes all incidents of chemical uses of force, where chemical agents were the only force used. Incidents recorded include those that indicate “chemicals” used, those that describe a type of chemical agent used, or those that note “decontamination shower given for exposure.” Also included in this item are all uses of the “pepper ball launcher” *unless* the pepper ball launcher is described as shooting “water” or “foam baton” rounds. Types of chemical agents were not otherwise distinguished between due to variation in reporting practices and the availability of alternate use of force data sources.
- *Physical* --includes all incidents of physical uses of force where physical force was the only force used. Incidents recorded include those that state “physical” force was used, those that describe particular physical restraint holds or those for which it is clear that youth resisted and physical restraint was used (where, for example, youth are described as being “taken down,” “placed,” or “proned-out” on the floor). Where it appears likely or probable that physical force was used but none of the above described factors were present (youth are described as “resisting” “fighting” or being “defiant” and are “brought” to, “escorted” or “placed” in another location) physical

force was not recorded. This item also includes uses of the pepper ball launcher in shooting “water” or “foam baton” rounds. Two incidents involving the use of a baton were also coded as physical uses of force.

- *Mechanical*-- includes all incidents of mechanical restraint where only mechanical restraints were used including hand cuffs, flex cuffs and leg irons. Also included in this category were uses of the protective “shield,” spit mask, and the emergency restraint chair. Incidents recorded include those that state “mechanical restraints” were applied or a specific mechanical restraint is mentioned or “youth resisted” while cuffing or where it is clear that youth resisted application of mechanical restraints. Where it appears likely or probable that mechanical restraints were used but none of the above described factors were present, mechanical restraints were not recorded.
- *Chemical and Physical*—both chemical and physical as defined above.
- *Chemical and Mechanical*—both chemical and mechanical as described above.
- *Mechanical and Physical*—both mechanical and physical as described above.
- *Chemical, Physical and Mechanical*-- includes all reported incidents of chemical, physical and mechanical restraint as described above.

FINDINGS

Violence

Daily operational reports show a total of 4,671 incidents of violence in DJJ facilities for twelve months from January to June 2005 and January to June 2006. The majority of these incidents (3,777), were one-on-one fights between youth, followed by 341 attacks of two-or-more youth on one youth victim, 185 fights involving three or more youth, 142 group disturbances, 100 batteries on staff, 81 staff gassings, 5 sexual assaults and 40 suicide attempts. This data is illustrated in Table 1 below.

Table 1

Total Incidents of Violence by Type of Incident: January - June 2005 & 2006

		Number of Incidents	Percent
Type of Fight or Incident	1-on-1	3777	80.9
	2 (or more)-on-1	341	7.3
	3-or-more	185	4.0
	Group Disturbance	142	3.0
	Staff Battery	100	2.1
	Staff Gassing	81	1.7
	Sexual Assault	5	.1
	Suicide Attempt	40	.9
	Total	4671	100.0

Source: CDCR-DJJ Daily Operational Security Reports

From the first six months of 2005 to the first six months of 2006, daily operational reports reflect a 3.7% decrease in total incidents, from 2,379 incidents in the first six months of 2005 to 2,292 in the same period a year later. Table 2 illustrates a breakdown of types of incidents for each period.

Table 2

Incidents of Violence by Type of Incident: January - June 2005 & 2006

		Year		Total
		2005	2006	
Type of Incident	1-on-1	1889	1888	3777
	2 (or more)-on-1	169	172	341
	3-or-more	105	80	185
	Group Disturbance	79	63	142
	Staff Battery	58	42	100
	Staff Gassing	46	35	81
	Sexual Assault	2	3	5
	Suicide Attempt	31	9	40
	Total	2379	2292	4671

Source: CDCR-DJJ Daily Operational Security Reports

Of the eight facilities, Chaderjian, O.H. Close and Ventura saw a reduction in total incidents from the first period to the second. Chaderjian daily operational reports reflect 69%

fewer incidents in the 2006 period than a year earlier. O.H. Close saw a 30% reduction in reported incidents from one year to the next and Ventura's reported incidents reduced 7%. Daily operational reports from the remaining five facilities, Dewitt, Paso Robles, Preston, Stark and Southern Clinic all show increased incidents of violence from the first period to the second. At Dewitt, incidents increased 10% from the first six months of 2005 to 2006, at Paso Robles, 9%, at Preston, 14%, at Stark, 9% and at Southern Clinic, 3%. Table 3 below illustrates frequencies of types of incidents each year at each facility.

Incidents of violence per 100 youth were calculated for the two periods as well as the percent change in incidents over time.² From January - June 2005 to January - June 2006, Chaderjian's average population decreased by 42%. Incidents of violence per 100 youth at the facility decreased 46%. Dewitt's average population decreased 10%, but incidents of violence per 100 youth increased 22%. The average population at Paso Robles decreased by 20%, but the facility's recorded incidents of violence per 100 youth increased 37%. O.H. Close saw a 9% reduction in average population and a 23% reduction in incidents of violence. Preston's population decreased 7%, but incidents of violence per 100 youth increased 22%. Stark's average population increased 3% (Stark is the only facility that had an average population increase) and Stark's incidents of violence per 100 youth increased 6%. Southern Clinic's average population decreased 2%, and recorded incidents of violence increased 5%. Finally, the average population at Ventura decreased by 15% but incidents of violence per 100 youth increased by 9%. Table 4 illustrates average facility populations, incidents of violence per 100 youth, and percent changes from the first six months of 2005 to the first six months of 2006.

² Monthly "actual population" totals were averaged for each facility for the two six month periods. See Attachment C for DJJ population data.

Southern Clinic	276	248	89.9	271	(-1.8%)	255	94.1	(+4.7%)
Ventura	153	67	43.8	130	(-15%)	62	47.7	(+8.9%)
DJJ Total	3169	2379	75.1	2784	(-12%)	2292	82.3	(+9.6%)

Serious Incidents

For each incident counted, the provision of corresponding serious incident reports was noted. Incidents for which serious incident reports were noted include incidents of violence as well as incidents of “NFI or other disruptive behavior” and “secure area extractions.” Serious incidents not subsumed under the nine “types of incidents” categories were not counted. Of the nine types of incidents counted, DJJ policy identifies the following as “serious” incidents: group disturbances (reported at the discretion of facility superintendents), staff batteries, staff gassings, attempted suicides and secure area extractions where extraction teams are utilized. Policy also requires reporting any incident that results in serious injury or otherwise significantly impacts facility operations.³ Table 5 illustrates total serious incident reports provided by type of incident for each facility.

³ See, *First Report of the Special Master, Appendix G: DJJ Serious Incident Reporting Policy*

Serious incident reporting policy requires facility staff to note whether serious incidents are “gang related.” For serious incident reports received, gang related serious incidents were reported with substantial variation between facilities. Chaderjian, Dewitt, O.H. Close and Preston serious incident reports show that roughly one-half of serious incidents are gang related. Of serious incidents at Paso Robles, more than 80% are reported as gang related. Southern Clinic reports reflect 20% of serious incidents are gang related and Stark and Ventura reports reflect fewer than 10% of serious incidents are gang related. Table 6 illustrates total gang related serious incidents by facility. Table 7 illustrates total gang related serious incidents by type of incident for each facility.

Uses of Force

For incidents recorded, daily operational reports generally indicate whether and which type of force is used. It is important to note that daily operational reports are not the best data

source for counting total uses of force or for distinguishing between types of force used. DJJ staff are required to report every use of force in the form of use of force reports. These reports are the best data source for identifying totals and types of force used. However, uses of force as recorded in daily operational reports provide a snapshot of the types of incidents during which force is used.

Daily operational reports reflect a total of 2,914 uses of force in DJJ facilities for a twelve month period from January to June 2005 and January to June 2006. The large majority of reported uses of force (2,506) involved chemical agents, followed by physical force reported in 218 incidents. Both chemical and physical force were used in 107 incidents. Daily operational reports show that mechanical force was used in 23 incidents and both chemical and mechanical force were reported in 17 incidents. There were 24 reported incidents in which chemical, physical and mechanical force were used. Table 8 shows totals for types of force used at all DJJ facilities.

Table 8

Total Uses of Force by Type of Force: January - June 2005 & 2006

		Number of Incidents	Percent
Type of Force Used	Chemical	2506	86.0
	Physical	218	7.5
	Mechanical	23	.8
	Chemical and Physical	107	3.7
	Chemical and Mechanical	17	.6
	Mechanical and Physical	19	.7
	Chem, Phys & Mech	24	.8
	Total	2914	100.0

Source: CDCR-DJJ Daily Operational Security Reports

Daily operational reports reflect 5% fewer uses of force in the first six months of 2006 (1,421) compared to the first six months of 2005 (1,493). Table 9 illustrates types of force used at all DJJ facilities for each six month period.

Table 9

Uses of Force by Type of Force: January - June 2005 & 2006

Count		Year		Total
		2005	2006	
Type of Force Used	Chemical	1289	1217	2506

The most frequent occurrence of violence across facilities is one-on-one fights between youth. At Chaderjian, uses of force in one-on-one fights decreased from 51% in 2005 to 42% in 2006. In 2005, there were a total of 38 uses of force where youth refused to follow instructions or displayed otherwise disruptive behavior. In 2006, reported uses of force for not following instructions/other disruptive behavior increased to 56. Table 10 shows uses of force by type of incident at Chaderjian for January – June 2005 and January – June 2006. Table 11 shows uses of force by type of incident *and* type of force at Chaderjian for January – June 2005 and January – June 2006.

At Paso Robles, uses of force during one-on-one fights decreased from 32% in the first six months of 2005 to 28% in the first six months of 2006. Daily operational reports show an increase in uses of force where youth refused to follow instructions or were otherwise disruptive--from 23 incidents in the first six months of 2005 to 63 incidents the following year. Table 14 shows uses of force by type of incident at Paso Robles for January – June 2005 and January – June 2006. Table 15 shows uses of force by type of incident *and* type of force at Paso Robles for January – June 2005 and January – June 2006.

Preston's daily operational reports reflect increases in overall uses of force and uses of force during one-on-one fights. In the 2005 period, force was used in 36% of one-on-one fights and in 39% of one-on-ones the following year. Table 18 shows uses of force by type of incident at Preston for January – June 2005 and January – June 2006. Table 19 shows uses of force by type of incident *and* type of force at Preston for January – June 2005 and January – June 2006.

Stark supervisor log books reflect an overall decrease in uses of force and a decrease in uses of force during one-on-one fights. In the 2005 period, log books report force was used in 56% of one-on-one fights. In the 2006 period, force was used in 39% of one-on-ones. Logs also reflect a decrease in uses of force on youth who fail to follow instructions (178 incidents in the first six month period to 130 the following year). Table 20 shows uses of force by type of incident at Stark for January – June 2005 and January – June 2006. Table 21 shows uses of force by type of incident and type of force at Stark for January – June 2005 and January – June 2006.

TDO # 06-38

(All Division of Juvenile Justice facilities)

This Temporary Departmental Order (TDO) shall be in effect until the development of policies and regulations are completed. **Please remove and discard TDO #05-33.** This TDO will replace TDO 05-33 to reflect the new expiration date. This TDO will remain in effect through April 14, 2007 and will expire at such time.

To facilitate the archiving and retrieval of this document the above header includes the title of the manual, subject, section number, and revision number.

All manual holders should log this revision in their Revision Record sheet (very first page of their manual) utilizing the above Revision #. All manual holders should insert this document in their manual between pages that have the same or closest section number to the above section number. The cover memo, if any attached, does not need to be inserted into the manual.

This TDO must be duplicated and distributed on yellow paper.

Any questions or concerns should be directed to Binh On of the Policy, Procedures, Programs, and Regulations Unit, at (916) 262-2753 or via email: bon@cya.ca.gov.

General Policy

The Division of Juvenile Justice (DJJ) will place wards on High Risk Observation (HRO) when they are perceived to be at risk of self-injurious behavior. A Mental Health Professional will complete an assessment to determine if a ward will remain on HRO or be placed on Suicide Watch or Crisis Watch. Specific measures will be taken to minimize isolation wards may experience on Suicide Watch, Crisis Watch, or HRO.

Definitions

High Risk Observation – Placement initiated by DJJ staff of a ward in a safe room with only an approved suicide prevention smock, blanket and mattress.

Suicide Watch – A clinical determination of immediate risk of self-harm resulting in placement in a suicide safe room under the same safety precautions as High Risk Observation.

Crisis Watch – A clinical determination of acute decompensation of a mental health condition or illness that requires close monitoring. The patient may or may not be placed in a safe room with only an approved suicide prevention smock, blanket and mattress.

Mental Health Professional – A Psychiatrist, Psychologist, or Licensed Clinical Social Worker employed in that capacity.

Procedures

Assessment, Treatment and Counseling Services

1. For the duration of a ward's placement on HRO or Suicide Watch, he/she will spend as much time out of their assigned suicide safe room as determined to be clinically appropriate by the treating mental health professional. Time out of the safe room will be utilized for:
 - Face-to-face contact with psychologist/psychiatrist – duration of contact to be based on mental status and treatment need.
 - Face-to-face contact with Youth Correctional Counselor (YCC) – One hour
 - During regular work week, additional services, including a minimum 30-minute face-to-face contact with Casework Specialist/Parole Agent I
 - Program/activities– Three hours
 - Meals and shower – One hour

IT-35

6268

Any adjustments to the above timeframes and activities will depend on the ward's mental status, reduction in self-injurious behavior and current level of functioning as assessed and ordered by a mental health professional. Documentation of the assessment will be made on the Mental Health tab in the Ward Information Network (WIN).

2. When wards are on extended HRO or Suicide Watch as a danger to self (only) beyond 24 hours, they may participate in their regular core program activities as specifically ordered and documented by the treating mental health professional. This includes participation in education, treatment, recreation, visitation, etc. The wards shall participate in program activities on their regularly assigned living unit when possible. If clinically appropriate, they shall be offered the same amount of program activities they would normally receive (when not on HRO or Suicide Watch). A mental health professional may permit a ward that is on Suicide Watch to have an additional non-dangerous item such as a paperback book and other reading materials that do not contain staples, after the first 24 hours on watch. The escorting of these wards is the responsibility of the peace officer staff assigned to provide line of sight supervision when the ward is outside of the suicide safe room.
3. Any use of force required on a ward on Suicide Watch shall be consistent with existing policy regarding wards identified with mental health issues.
4. The treating mental health professional shall complete an assessment to determine if the ward's current Level of Care (LOC) and/or treatment plan is still appropriate. This may include an assessment for referral and placement into an acute care facility.

Note: A mental health professional shall conduct a face-to-face assessment of each ward on HRO every 24 hours, and document the treatment provided in the WIN and Unified Health Record (UHR).

5. In the event a ward remains on Suicide Watch or Crisis Watch for more than seventy-two (72) hours during regular business days (Monday through Friday, non-holiday), the following procedures will be followed, specifically:
 - Notify the Chief Psychiatrist or the Mental Health Program Administrator in Health Care Services by fax after the initial seventy-two (72) hours, and every subsequent seventy-two (72) hour period. The fax shall include a synopsis of the ward's treatment progress and reason for extension.

6268

- A Special Program Assessment Needs (SPAN) referral will be made to assess the ward's current LOC needs. If appropriate, a SPAN will be completed within ten business days from receipt of the referral to the assigned mental health professional.
 - If an acute care referral and placement is warranted, arrangements for the immediate placement of the ward shall be made by the designated mental health professional and facility staff.
6. Within three (3) regular business days (Monday through Friday, non-holiday) of release from Suicide Watch, the assigned Casework Specialist/Parole Agent I, in consultation with the mental health professional who completed the Post Suicide Watch Precautionary Plan form, Y.A 8.282.1, will develop or update an Identified Treatment Issue (ITI) to address the underlying treatment issues that resulted in placement on Suicide Watch.

Direct Line of Sight Supervision

1. During those periods of time when wards are participating in activities outside of the suicide safe room they shall be under the direct line of sight supervision of a designated peace officer, whose responsibility is to protect the ward from self-harm. At no time shall the ward be out of the line of sight or, at an unsafe distance, from the designated staff. This peace officer shall be an addition to the normal posted staffing pattern of the unit housing the ward on Suicide Watch. One peace officer will be assigned the direct line of sight supervision to no more than one ward programming outside of the suicide safe room.
2. Staff designated to provide direct line of sight supervision to wards participating in their regular core program activities outside the suicide safe room shall meet the following standards:
 - Provide direct line of sight supervision for no more than one ward at a time;
 - Remain within a safe, responsive distance from the ward being supervised;
 - Communicate and interact with the ward;
 - Participate in no other job duties while providing direct line of sight supervision;
 - Document on the SPAR: Suicide Watch Record form YA 8.286 (15 minute check sheet) when direct line of sight supervision outside the suicide-safe room began and ended;
 - Document any significant information regarding the ward's behavior, comments, etc. while outside the suicide safe room in the Unit Log on the HRO unit;

 California Department of Corrections and Rehabilitation Division of Juvenile Justice Effective Date: April 14, 2006 Expiration Date: April 14, 2007	Subject: Wards Requiring Acute Psychiatric Care		
	Manual: ☐ Administrative Manual (YAM) ☐ Education Manual ☒ Institutions and Camps Manual ☐ Parole Services Manual	Revision #: IT-36	Section #: 6269

General Policy

The Division of Juvenile Justice (DJJ) shall place wards on High Risk Observation (HRO), Crisis Watch, or Suicide Watch when they have been identified as possibly requiring acute psychiatric care (licensed, 24 hour, inpatient care) by a mental health professional (i.e. Psychiatrist, Psychologist, Licensed Clinical Social Worker (LCSW) hired to work in that capacity). DJJ shall, after determining that a ward meets the requirements as set forth in Welfare and Institutions Code 5150 (i.e., when a person, as a result of mental disorder, is a danger to others, or to himself/herself, or gravely disabled), make arrangements to transport the ward to a Correctional Treatment Center (CTC), a community acute care facility, or appropriate level of care within the department.

Definitions

High Risk Observation – Placement initiated by DJJ staff of a ward in a safe room with only an approved suicide prevention smock, blanket and mattress.

Suicide Watch – A clinical determination of immediate risk of self-harm resulting in placement in a suicide safe room under the same safety precautions as High Risk Observation.

Crisis Watch – A clinical determination of acute decompensation of a mental health condition or illness that requires close monitoring. The patient may or may not be placed in a safe room with only an approved suicide prevention smock, blanket and mattress.

Mental Health Professional – A Psychiatrist, Psychologist, or Licensed Clinical Social Worker employed in that capacity.

Procedures

Assessment, Treatment and Counseling Services

1. Throughout the ward's placement on High Risk Observation (HRO), Crisis Watch, or Suicide Watch, and depending on the ward's mental status, reduction in self-injurious behavior and current level of functioning as assessed by a mental health professional, he/she will spend as much time out of their assigned suicide safe room as determined to be clinically appropriate by the treating mental health professional. Time out of the safe room will be utilized for:

- Face-to-face contact with psychologist/psychiatrist – duration of contact to be based on mental status and treatment need.
- Face-to-face contact with Youth Correctional Counselor (YCC) – One hour
- During regular work week, additional services including a minimum 30-minute face-to-face contact with Casework Specialist/Parole Agent I
- Program/activities as defined by the mental health professional – Three hours
- Meals and shower – One hour

Any adjustments to the above timeframes and activities (including program activities) will depend on the ward's mental status, reduction in self-injurious behavior and current level of functioning as assessed and ordered by a mental health professional. Documentation of the assessment will be made on the Mental Health tab in the Ward Information Network (WIN).

2. Wards meeting the criteria for danger to self/others or gravely disabled shall immediately be placed in a suicide safe room in an Outpatient Housing Unit (OHU) if available; if unavailable, in a safe-room on either an Intensive Treatment Program or a Specialized Behavior Treatment Program.
3. Any use of force required on a ward on Suicide Watch shall be consistent with existing policy regarding wards identified with mental health issues.
4. The treating mental health professional shall complete an assessment to determine the ward's Level of Care (LOC) needs and whether placement in a licensed bed is required, and document the decision in the WIN and Unified Health Record (UHR).
5. Once it is established that the ward meets the criteria for danger to self/others or gravely disabled and requiring acute psychiatric care (i.e. serious suicide attempt, actively suicidal, acute psychotic episode, etc.), arrangements for immediate placement and transport of the ward to a CTC or designated community acute care facility shall be made by the designated mental health professional and facility staff.
6. If due to transportation delays, a lack of available bed space or rejection of placement into such facility, the ward unable to be placed immediately, the above mentioned procedures for assessment and treatment shall be followed until placement occurs.
7. During regular business days (Monday through Friday, non-holiday) notify the Chief Psychiatrist or the Program Administrator in Health Care Services by fax after the initial twenty-four (24) hours, and every subsequent twenty-four (24) hour period. The fax shall include a synopsis of the ward's treatment progress and plans for securing appropriate placement.
